

STATEMENT OF ACCEPTANCE OF CONDITIONS AND RESPONSIBILITIES PERTAINING TO THE PUBLICATION OF A MANUSCRIPT

Title of paper:

Authors:

Before your paper can be sent for review, you are required to acknowledge and agree to the following conditions pertaining to ethical issues related to the publication of a paper.

1. This journal subscribes to the criteria for authorship of research articles, developed by the International Committee of Medical Journal Editors.¹ In order to be acknowledged as an author, individuals must have satisfied the following three criteria:
“1) Substantial contributions to conception and design, or acquisition of data, or analysis and interpretation of data;
2) drafting the article or revising it critically for important intellectual content; and
3) final approval of the version to be published.”
In terms of this, “Acquisition of funding, collection of data, or general supervision of the research group, alone, does not justify authorship.”
In addition, all individuals who qualify for authorship of the research paper must be listed as authors.
2. Authors are required to declare any potential conflict of interest. These can include financial or personal relationships in the form of dual commitments, competing interests or competing loyalties.¹
3. Authors are advised that it is their responsibility to determine whether agreement is required from any parties for the use of material in their article, and to ensure that such permission is obtained, so that copyright is not infringed.
4. Authors are required to give the assurance that the content of the manuscript is their own work, and where it is not that appropriate acknowledgement is given.
5. Authors are responsible for ensuring that statistical analyses contained within the manuscript have been checked for appropriateness and accuracy by a person with a sound knowledge of statistics.
6. Authors must inform the Editor of the existence of any other papers, which they have submitted to or had published by other journals, or that are in the public domain, and that overlap with this manuscript. Copies of such papers must be supplied to the Editor.
